This method prevents any loss of blood and eliminates the pain which would follow a subcutaneous escape of the salvarsan solution before the leak was discovered, while the salt solution does not cause pain or leave an induration. If the vein is not prominent, or if several unsuccessful attempts at introducing the needle have been experienced, cocaine is injected, an incision made through the skin, and the vein exposed so that the needle may be accurately inserted. Molded In Terminals Over the years, Centrifugal Castings has perfected the art and science of producing molded in terminals that exceed our customers' needs. Nongnout Daothong Country Coordinator Ms. Koplj, of Munich, writes of being discouraged by the frequent local necrosis following subcutaneous injection. The ligature around the patient's arm is then removed and the salt solution elevated and allowed to flow to see if the passage into the vein is free or if a leak occurs from an imperfect entrance. We have already completed several projects of this genre. Remember, if you have a specific need, please call us and we will work with you to design the product to fit your needs.
