This class includes drugs such as ramipril brand name: This could mean that the drug companies are withholding unfavorable findings related to their drugs. Data collection and analysis: No ACE inhibitor drug appears to be any better or worse than others in terms of blood pressure lowering ability. The review did not provide a good estimate of the incidence of harms associated with ACE inhibitors because of the short duration of the trials and the lack of reporting of adverse effects in many of the trials. ACE inhibitors are widely prescribed for hypertension so it is essential to determine and compare their effects on blood pressure BP , heart rate and withdrawals due to adverse effects WDAE. Prescribing the least expensive ACE inhibitor in lower doses will lead to substantial cost savings, and possibly a reduction in dose-related adverse events. You may also be interested in: Altace , captopril Capoten , enalapril Vasotec , fosinopril Monopril , lisinopril Prinivil, Zestril and quinapril Accupril. WDAE information was collected from the trials. These trials evaluated the blood pressure lowering ability of 14 different ACE inhibitors in 12 participants. There was an 8-point reduction in the upper number that signifies the systolic pressure and a 5-point reduction in the lower number that signifies the diastolic pressure. The blood pressure lowering effect was modest. Angiotensin converting enzyme ACE inhibitors versus angiotensin receptor blockers for primary hypertension Time effects of blood pressure lowering drugs for the treatment of high blood pressure Methyldopa reduces blood pressure in people with high blood pressure Blood pressure lowering efficacy of aliskiren Long-term effects of weight-reducing drugs in people with elevated blood pressure.
