It is illegal to sell drugs without an appropriate licence and, in the UK, there are currently no internet pharmacists that are licensed to distribute viagra without a prescription. Viagra-style drugs bought online may be counterfeit, contain unsafe levels of active ingredients or have other harmful substances added to them. To get permission, pharmacies must be approved by the Medicines and Healthcare Regulatory Agency and the Care Quality Commission, which regulate the provision of medicines and healthcare. So far, Boots is the only pharmacy to have been given such permission. There are legitimate internet pharmacies which sell medications online. Does this mean I can go into a pharmacy and buy viagra? Even if a product on sale is genuine, medicines can interact with each other and many need to be accompanied by safety checks and advice from qualified, regulated clinical staff. Unregulated websites cannot provide this important safety measure. How can I tell if an online pharmacy is regulated? Boots is the only pharmacist to have received permission to sell prescription-only viagra, and any issuing of viagra must be accompanied by appropriate health checks. Check here for alerts. What if I have purchased or used a medication that I think may be illegal? While internet pharmacies can make it easier to obtain prescribed drugs, they cannot replace necessary face-to-face consultations with clinical staff, as the RPS has emphasised. This is because viagra can potentially interact with common medicines, such as blood pressure and angina medication, or cause complications if used by people with certain health conditions. Viagra to go on sale over the counter. Are there legitimate internet pharmacies? Viagra was under patent protection in the UK until June , after which legal cheaper versions of generic Viagra (sildenafil) have been made available. In November the UK s medicines regulator approved an application by Pfizer to reclassify its sildenafil 50mg to a 'P' medicine (available without prescription) which. Sildenafil citrate was originally developed by the pharmaceutical company Pfizer. Pfizer decided to begin selling it under the brand name Viagra for the treatment of erectile dysfunction, and until June they were the only company that could legally manufacture it.
